Vo141/Vo104 Series For Single Jersey

New Launch

Along with great variety and innovation in the single knitting field, functionality and durability are just as important.

Through continued research and development, we are committed to the production of high quality knitting machine needles.

01 Prevention of Yarn Breakage

Innovated latch spoon shape alleviates yarn breakage through friction, and avoids contact with the sinker. Its edge is less prone to getting shape over long-term use(*).
Previous Type

New Type - Vo 14141

*Friction between the latch spoon and the sinker over lengthy period of knitting may result in sharpening of the spoon edge. A sharpened edge leads to yarn breakage.

02 Reduction of Latch Wear

Latch seat has been optimized to reduce the load on latch. This prevents yarn breakage and enables long-term use. Latch wear comparison of the same time period of use

Previous Type

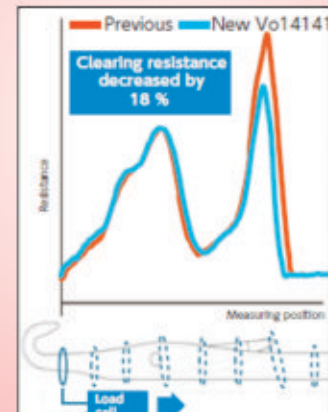

New Type
Vo 14141

03 Improved Clearing Performance

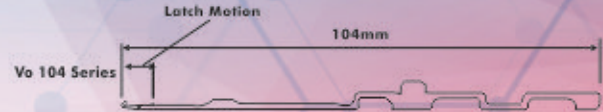

By reducing resistance during clearing, the load on the latch is decreased, making it suitable for long-term use.

Clearing Resistance of Needle

Starting with 28G - 8mm latch type

ABOUT US

AUTHORISED DEALER:
Y.G.H. Sinkers
Taiwan

Manufacturer Who Listens to the customer voice

Yeong Guan Haur has 40-year sinker making experience. Precision and durability have been the priorities since the very first batch. We proudly provide sinkers made from premium carbon steel with proper heat treatment.

Thanks to the great experiences we've learned from decades of manufacturing sinkers and studying the market, we are capable of customizing and modifying sinkers in required designs, dimensions and thicknesses in fairly reasonable prices. YGH offers various type of double-thickness materials for clients to choose from.

Get customized high quality sinkers with fast delivery from YGH, Now.
